# Andy's Epic HTML Fan Pages (With CSS this time)

Part 2

Colors and fonts change when links are selected. They also change size, because I thought it would be funny.

#### Part 3

As can be seen in the above image, all links have different colors and highlights. Each highlight corresponds to an image page, because I thought that would be funny.

### Part 4

ndrew Ruff is a Junior Computer Science Major from Oletha, Kansas. He lives on campus, and is suitemates with my buddy Ethan. For fun, he likes to talk to his girlfriend, program things, and go to lunch with me at the SUB MWF after our Classical Greek Philosophy class. Some fun facts about him are that he really likes Arch Linux, he does a lot of computer science outside of class, he plays Piranha Plant in Super Smash Brothers Ultimate (but he does not play very often), and that he is the wrong soup (not to be confused with the right soup, an entity assumed to be our buddy Chris). Also, I am in love with him.

The first letter and line are special now (which is on brand because this fan page covers special people).

#### Part 5

friends with). Some fun facts about Dr. Kafi is that his name is NOT based on Coffee (the caffeinated beverage) or Ramen (the Japanese noodle), he's the second longest standing professor in Truman CS, and he hasn't added me back on Linkedin. I cannot legally say I am in love with him because he is my professor and that would get me in trouble, but I can say he's pretty cool.

After the conductive of the second longest standing professor in Truman CS, and he hasn't added me back on Linkedin. I cannot legally say I am in love with him because he is my professor and that would get me in trouble, but I can say he's pretty cool.

PDF documents are represented by this photo Akansha took on my phone, DOCX files are represented by Julian's face from the photo Dr. Kafi took with us.

#### Part 6

- Since Kaff is special, I put his entire page in a footer, and then added another footer here. Also, this is required for the assignment, and this is the last page, so it only makes sense for the footer to foot the fan pages, in a somewhat footy manner. It also gives a special effect of having multiple colors, which is super special. All around a very special conclusion to some very special fanpages.

  The the themse of the charge of the charge that here. This serves no other purposes where them to check the two on my to-do introping I did this popul I did this part. Thankel.
  - i. To fit the theme of fitting something in at the end that I couldn't work in anywhere else, we have this section that I included with the express intent of meeting program requirements.

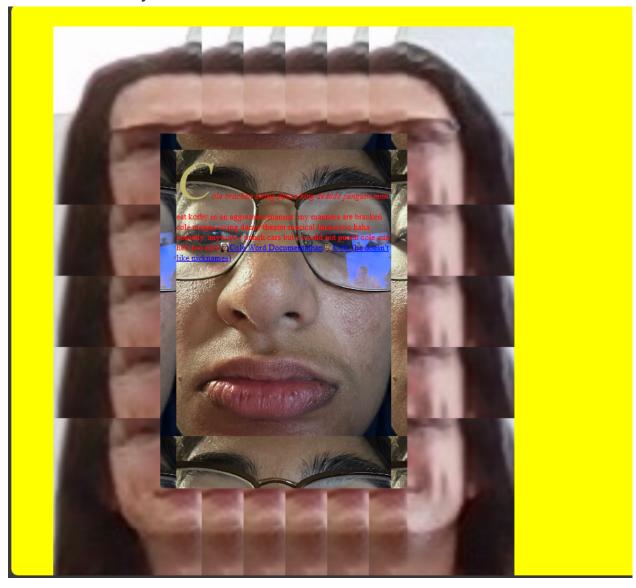

b. I used these to change the font on Cole and Alex's pages.

This is me and my Bestest Buddy In the WHOLE World Cole Bracken. Some fun facts about Cole Bracken are that he dances a lot (and he's really good at it), he is something of a mysterious indvidual (wild sightings are rare) and it took five minutes of questioning to determine that it is "not necessarily inaccurate" to describe his favorite candy as a basic Hersheys bar. I am also MADLY in love with him, and would do anything for him.

Click the next link for more fun facts about the coolest person on campus (this is unironically true, despite the fact that he would probably rather die than compliment himself) Cole Bracken.

## Part 7

I used this section of the assignment as an excuse to create some eldritch css monsters out of my friends' faces.

Some of them do also have a scroll bar

I used rounded design to make some of the images tessellate (the 'round' keyword in code).
